**DETAILED ACTION**

***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- Figures 1A and 1B
- Figure 3
- Figure 5
- Figure 6
- Figures 7A and 7B
- Figure 8
- Figures 9A to 9D
- Figure 11
- Figures 20A and 20B
- Figures 21A and 21B

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Art Unit: 2875

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Figure(s)	Corresponding Claim(s)
3	22-28, 38
7A and 7B	29
8, 9A-pD	30, 32-37
11	31, 32-37
14	39
17	40

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: while each of the claims have the same end product (even brightness of the LCD backlight), each of these species provide independent means for achieving the even brightness.

4. The Examiner would like to remind Applicant of multiple dependent claims, specifically 32 and 36. These claims are dependent on two independent claims of different species.
